

Moodle

The Virtual Learning Environment (VLE) Moodle is a learning management system. VLE provides electronic study material (slides, documents, links, etc.), organizes student activities (tests, assignments, etc.), and hosts other relevant information related to studies and library services. For assistance with Moodle course creation or deletion, questions about using Moodle or Teams, please contact **ITC Systems Administrator Inesa Sereikaite** via email at i.sereikaite@kvk.lt, by phone at **+37065511803**, via Teams, or visit **room 125, Business Faculty, Jaunystės g. 1**.

How to log in?

System URL:

<https://moodle.kvk.lt/>

Use your login name without the “@kvk.lt” or “@kvk.edu.lt” suffixes and the general system password.

Instructions for instructors

[Moodle user guide for lecturers \(LT\)](#)

[Guide to using remote study tools and platforms at Klaipėda State University of Applied Sciences for instructors \(previous version\)](#)

[Statistical and psychometric analysis of Moodle test results \(LSMU publication\)](#)

[How to download all student work uploaded to a Moodle assignment?](#)

[Moodle Docs 4.3](#)

Demo environments

Choose where you want to explore Moodle features and functions:

- **Mount Orange School** environment with courses, activities, and users;
- **Moodle Sandbox** a blank environment.

Tools for creating Moodle content and resources

IMS and SCORM package creation

Adapt. A free interactive e-learning content creation tool based on HTML5. No programming knowledge is required.

eXeLearning. A free program for creating interactive learning material in XHTML and HTML5 formats, which can be integrated into Moodle.

Creating video and audio recordings

Audacity. A program that allows creating and editing audio files: removing noise, segmenting recordings, adding sound effects, and combining different recordings. Audio files can be saved in popular audio formats.

VSDC Free Video Editor. A free video editing program that allows you to cut, merge video clips, add video effects, etc.
