

IT Incident Reporting System

Links to the system: <http://gedimai.kvk.lt/> or <https://kvkedu.sharepoint.com/sites/gedimusistema>

The „**IT Incident Reporting System**“ operates at Klaipėdos valstybinė kolegija. In this system, you can report problems related to the college's IT equipment and resources, such as:

- **Technical issues and malfunctioning IT equipment** (e.g., non-working printer, monitor not turning on, computer not booting, projector not displaying, headphones or microphone not transmitting sound, etc.);
- **Software issues** (e.g., a computer program in a classroom not working, the program shutting down unexpectedly, the program displaying an error message, etc.);
- **System failures and disruptions** (e.g., EDINOS login not working, Moodle system errors and problems, printing or library system not functioning, etc.).

When filling out a request form in the „IT Incident Reporting System,“ provide as much information as possible to help resolve the issue. If possible, attach screenshot files ([information on how to take a screenshot](#)) or other relevant details.

How to use the system:
